

The United Nations Framework Convention on Climate Change - Clean Development Mechanism protocols.

The survey of Syrian landfills has been executed in 2006 on behalf of FINOPI-BANCA OPI ENDESA-Italia and the Syrian Minister of Environment. It is based on the Trivalor's 2004 'Master Plan of Waste Management' and aimed to evaluate the Certificates of Emission Reduction (CER) potential of the four major Syrian landfills of Damascus, Homs, Ladakie, Alep. It has been the first study of this kind carried out in a southern Mediterranean country.
